

LEARNING PATH INTEGRATED TECHNIQUE WORKSHOP

Cost: \$275

Learn to

- Sense energy with your hands (deviceless dowsing)
- Clear energy from your body and your environment that does not belong there
- Identify first root causes
- Access and bring healing to the genes
- Un-create memory
- Reconnect to your perfect blueprint
- Heal relationships
- Deal effectively with emotions such as anger, fear and guilt
- Heal repressed/hidden memory of trauma

What is the Learning Path Integrated Technique?

The Learning Path Integrated Technique is a technique that un-creates the first root cause of anything negative and re-creates the repressed positive. As well as dealing with a problem as it manifests in the 'now', it goes back to the very first root cause and heals the problem at that point in time. The body, mind, soul will then balance itself automatically.

How does it work?

The Learning Path Integrated Technique (LPIT) promotes healing at a genetic level and helps us to reconnect with our personal Perfect Blueprint. LPIT is an efficient and trauma free experience. Unlike other modalities, you do not have to revisit the trauma of the past. The practitioner would use hand motions and a diagram of the existence line of the soul. She would then clear the energy of, or heal, the first root cause of the problem, wherever it appeared on the existence line, and bring learning from that situation to the person that you once were. The practitioner would then rearrange the soul memory in order for that learning to permeate the rest of the existence line. As with Reiki, you can use LPIT for yourself. It works beautifully in conjunction with Reiki. Although very different, they are complementary systems of healing.
